

IKOI PRIMARY SCHOOL Mlola Ward - Renovation und Ausbau des Toilettenblocks

Request for support by Himchuli Schweiz

Dear ladies and gentlemen,

May peace be upon you. I'm happy to get this golden opportunity to present our great thanks on behalf of other organization members, local government and the fraternal people of Mlola ward.

Our message will touch the various segments as follows.

- a) Short explanation about the impact of the project in the target area.
- b) The validity of the project in the target area.
- c) The situation of several institutions on sanitation issues.
- d) Our sincere thanks for your support to fund our initiative.

A) SHORT EXPLANATION ABOUT THE IMPACT OF THE PROJECT IN THE TARGET AREA.

Dear funders, we are glory to inform you that our project impact has been tangible, reliable and impressive to those households' beneficiaries and community over the issue of sanitation. Furthermore it's considered as the first fantastic initiative in the area which could be imitated for the fostering development of the community, thus it increased our recognition in several community development occasions.

B) THE VALIDITY OF THE PROJECT IN THE TARGET AREA

Dear funders, I want to take this opportunity to approve on behalf of organization members that our project idea has been valid to the target area due to the positive reception and increase of not only households but also institutions which need help from us through our project.

C) THE SITUATION OF SEVERAL INSTITUTIONS ON SANITATION ISSUES

Dear funders, the real situation of several institutions on sanitation issues still so bad due to the lack of standard toilets which could serve those participants of such particular institutions. Those institutions include;

- 1) Religion institutions. I e churches and mosques
- 2) Health institutions. I e health centers and dispensaries
- 3) Education institutions. I e primary and secondary schools

Thus the situations of those institutions are not so good in such a way that it created a lot of complaints from the participants which made those institution leaders to face our organization leadership as they were asking for help to serve them from this burden.

Furthermore from those institutions complaints and requests we decided to suggest IKOI PRIMARY SCHOOL to be given the first priority when there will be the possibility of funding. The reason is that their pupils toilet has been destructed by heavy rainfall and bad weather condition hence now are real suffering from the lack of even local toilet to serve them.

We suggest this situation to be taken kindly as contingency project plan because the school administrators received order at recent from the district executive director that it remain a short time for the school to be closed until the problem of the lack of toilet will be resolved.

THE RPROJECT BUDGET

The project budget is about 2,162,000 Tsh which is equivalent to (867.94 swiss Franc)

Schedule 1
